

MINOS Status Report

- Week of 03/19/2012
 - Live time: 98.8%
 - POT fraction: 99.3%
 - Beam data logging problem largely seem to be fixed. Still need to recalculate values for last couple of months.
- Thursday replaced one MINDER generating errors. Unfortunately, problem recurred after a few days.
- Generating job list and assigning people for jobs during shutdown. Largest job: “refurb” DAQ using Gbit Ethernet and MVME 5500s instead of unsupported PVIC fiber data connection and RIO3 readout processor

MINOS Status Report

- Week of 03/19/2012
 - Live time: 99.6%
 - POT fraction: 99.8%
 - Note: DB problems which prevented POT fraction now resolved (this implies all PCs outside firewall are SL5)
